Copies of the Regulations pertaining to the units above described, may be obtained at the Area office. All registrations of hotels, rooming houses, tourist camps, etc., must be completed and filed in the Area Office by August 31, 1942. This final date should not be confused with that of houses, apartments and rooms, which is August 15th. Failure to register any unit may subject the landlord to a fine of \$5,000 or imprisonment of one year or both. Registration in Hamlin will be at the Red Cross Sewing Room.

Hot Weather And Cotton Outlook

This week, L. W. Bramblett, gin manager at Longworth, and a specialist in Entomology, was in the Herald office talking "cotton". He says that fields are beginning to show spotted. Depending on locality. Some are holding up fine, others just fair and others fast deteriorating.

Mr. Bramblett also had proof of leaf worms in some fields, regardless of hot scorching sunshine. Leaf worms are bugs that can be controlled, and need close watching. There is a debate going as to whether cotton needs rain or not. One rain may make cotton and one more may ruin it.

This cotton subject is like the senatorial race, one guess is as good as another.

A Message To Loyal Americans

In every state and in most communities a good start in the Salvage Program has been made, and now the framework of a salvage organization throughout the nation has been established.

A fine job has already been done on the salvage of waste paper, rubber and on scrap iron in many localities. Now our great challenge is to do in all localities an equally good job on iron and steel scrap, nonferrous metals and rags.

In addition, we have new responsibilities in the salvage of surplus cooking fats and, in certain cities, tin cans.

The immensity of the task we still face requires a stepping up of the tempo of the Salvage Program. If we are to keep our steel mills going full blast this winter, we must increase the flow of scrap iron and steel by at least 6,000,000 tons—25 per cent more than normal.

Another vital scrap material is scrap rubber. With the enemy controlling over 90 per cent of the world's crude rubber supply, and with synthetic rubber in volume at least a year away, scrap rubber has become an essential war material. We need all we can get.

Every evidence we have received indicates that the only way we can meet the requirements of war production is to obtain every bit of scrap from every home, every commercial establishment, every industrial enterprise in the country.

This means that under your direction every possible source of scrap must be periodically canvassed. It means the education and the day-to-day co-operation of every man, woman and child in the country. It means that we cannot afford to relax after a single drive.

The Salvage Program is not a one-week or a one-month campaign any more than this is a one-week war. Salvage is an all-out continuing effort and must be organized as such.

Supporting your work, we are making arrangements in Washington and through private industry to step up the program of appealing for scrap materials and of education on its disposal. We are also taking steps to make more man power and equipment available to local communities.

This is the people's job. It is a tangible task that anyone can perform to help win this war without interfering with other war work or with personal responsibilities.

BUREAU OF INDUSTRIAL CONSERVATION WAR PRODUCTION BOARD

From War Production Board

DEAR EDITOR:

As you know, a new campaign for the collection of iron and steel scrap, to be made into implements of war, is under way in Texas. I am writing you at this time to ask you to assist this new effort in every way possible, and especially to impress upon your readers the seriousness of the situation. Unless we can get in a great volume of scrap during the summer and autumn, many steel mills will be forced to shut down and every day lost means fewer guns, tanks, ships and shells to speed the Victory for which we are all working.

May I suggest that you assign some member of your staff to maintain contact with the salvage chairman in your city and county, that you handle the story in your own way, with special attention to human-interest incidents, and use whatever local photographs which may be possible. Ample background material will be found in the Official Plan for the National Salvage Program, a copy of which is being enclosed.

May I suggest also that your reporter constantly bear in mind these points:

1. That this is not just another "drive", but a sustained campaign which must now go on until the war is won.

2. That no piece of iron or steel scrap is too big or too small to be turned in.

3. That if there are big piles of scrap in dealers' yards that does not mean that the campaign is finished. We need all the scrap we can get. But the material will be moved only on direct orders from the steel mills, and those orders will come to us later than they come up North.

4. That salvage collection is the greatest opportunity for civilian participation in the war. Everybody wants to do what he can to help win the war; here is the chance for every man, woman and child to prove his patriotism.

As Salvage Chairman for the State, I shall greatly appreciate your assistance and co-operation in making this campaign an outstanding success in Texas.

Thank you!

Sincerely,

E. E. KIRKPATRICK, Chairman
Texas Salvage Committee

The Herald Must Go Out Earlier

From now on the Herald will go to press on Thursday afternoons in time to get the papers mailed on the West bound Santa Fe. This means a lot to the people of Fisher County. Bear in mind that we will not use copy sent in too late. Don't wait if you have something to go in the Herald. The sooner we get it the better. Subscribers of McCaulley, Sylvester, Longworth and Sweetwater may expect their Heralds on Friday, instead of Saturday as in the past.

Bicycle Traffic Needs Regulating In Hamlin

We have lived to see another bicycle age. And the present cycling age is different to the one of many years ago. Then the horse and buggy had to look out and today it is the motorist who shudders, or is it the pedestrian?

You know bicycles are noiseless, and the fellow who walks along with his mind on the war or some other far-away thing, or who might be coming out of a business house door, is likely to get bumped and hurt badly. Now this is something to think about. No one wants to hurt a friend or be hurt by a bicycle.

Maybe there is a City Ordinance governing the traffic of bicycles, and if not there should be. As a matter of fact, one who carelessly injures another in any form is responsible under some law. Many towns have ordinances exactly for the bicycle as they have for automobiles. Why not?

Many people in the smaller towns assume that "it makes no difference here" and take "hicky" privileges that look down right ratty or ridiculous to persons who come from places where right conduct is required.

There are a lot of "habits" allowed even in Hamlin that are not up to good regulations. One is that of men sitting flat on the sidewalks with their feet sticking out for pedestrians to go around or stumble on. Another is stopping automobiles on walks and making those who walk go out into the streets to get around them.

Revival At Dovie

The revival at Dovie is being well attended. Good interest is being shown. Bro. Grady Adcock of McCaulley is doing the preaching. The last service will be Sunday night, August 16, but we pray that the revival will go on in our hearts.

We invite you to attend these services.

THE WAR—

As We See It,

This is the second week of August, 1942, the year that some of us thought the Second World War would end, (that was before Pearl Harbor).

Take a broad look over the world this week. The "fronts of battle" still spread, and farther and farther away we learn of American boys in action or on the verge of action. All this lends especial concern to every American who wants to see this nation win the battle for Freedom.

In Russia, in India, in the Pacific, in North Africa, and all over the Atlantic with its islands, bays and coves the struggle goes hard on suffering humanity.

Wherever the Germans have thrown their wall of steel against the heroic Russians, they have plowed deeper and deeper into Russian home life, and find every wheat field, every home, every village, all oil wells, machinery, supplies and everything has been burned or destroyed.

The Germans have continued forward till by this week they have almost cut the lower heel of Russia away from the main body. This is serious if made complete. This should prompt Our Nations to throw enough against the Hitler hordes in that section to stop them cold. This would save Iran, Iraq, Palestine, Syria and perhaps Turkey from becoming conquered nations and permit the Germans to form two prongs of conquest on the Persian Gulf and the Suez Canal. This is danger jam up against India on the West, with the Japs crowding hard on India's East side, makes a situation that might require the United States to remain at war ten to twenty years. All haste it seems should be made to stop the Japs and Germans before this 1942 is over.

The scare in India sounds much worse than it really is. England has had plenty of experience in dealing with uprisings there. In a pinch she can call on the Moslems eighty millions to help slap the fanatic Hindus. Of course any disturbance anywhere hinders.

It makes cold chills run down our backs to hear of losses. We had better try to get accustomed to it. As for US we are just starting, and we have got a long, long road to travel. Every acre that Japan settles down on will cost US much loss to retake. And every inch she has taken must be regained and then some.

America has always been proud of her Marines. Our Marines are now reported as in hand-to-hand combat with the Japs. It sounds bad, but to be killed by a dagger thrust through the stomach is no worse than to be killed by a shot from a gun 1000 yards away . . . just sounds worse . . . no doubt but that for every American boy killed in the Solomon Islands Battle, more than 10 Japs will fall. The third major battle with the Japs is now raging, and already Our Nation has lost one cruiser, and several ships damaged . . . till this battle ends, all real Americans will stand their nerves on edge expecting a third great victory. Maybe this is the American Offensive long desired by US. Once an offensive starts it should be kept going and growing.

In the Aleutian Islands area, Our ships are pounding the Japs at Kiska. This may seem a small affair, but it is very important to stop the Japs on every point they may want to go.

In Libya, Rommel and his Italian henchmen are not getting toward Alexandria very fast. Something is cooking there. Don't be surprised to hear of a German army obliterated. That front must be won before the Russians can be helped farther north and the Middle East saved for Our Nations.

One thing very certain, every country overrun by Germany and Japan will be conquered for years unless freed by the United States and Great Britain.

Down in Texas there is a "battle for ballots" . . . in some respects there is similarity in "propaganda", in confusion to divide, to "came-flag" for position, but squads on the "home front corners" are not stimulating so much excitement in the "run-off". There is a blood and bones war on, you see. Not many minds will be changed, and which ever way the majority goes the "other side" will make the best of it.

Nazi To Hang—

Federal Judge Arthur J. Tuttle decreed Thursday that German-born Max Stephan must die for treason against the United States.

The Judge said: "Stephan never lost his love for Germany."

"The life of this traitor, Max Stephan, is less valuable than the lives of our loyal sons which are being given to the cause of the United States," Judge Tuttle said in a husky voice, visibly wrought.

"This court does not hesitate to take the life of one traitor if it, in turn, will help the just cause of the United States."

"This court, in no hesitating and uncertain way, should say to the disloyal element that during this awful war the penalty for treason is death."

"Disloyal citizens know even better than the court does," the judge said, "that a prisoner sentenced to life is eligible to pardon after fifteen years and also that after the war such prisoners often are paroled or their sentences commuted."

"Max Stephan's entire interest was to aid Germany's cause by helping Krug to return to Germany so that he might continue his career of death and destruction against our allies."

Then the judge ordered that Stephan be confined in a cell at Milan until November 13, "and on that day, within the walls of the federal correctional institution or within an enclosed yard thereof, the said defendant be by the United States Marshal hanged by the neck until he, the said Max Stephan, is dead."

What the German said:

Stephan apparently did not expect the death sentence. In his cell, puffing a cigar, he called out:

"Victory will be sure. Germany will not let me hang!"

"This war will be over soon and when it is over I will get out of jail. A victorious Germany will not leave Stephan in jail."

—T & T—

Remember This—

"Hitler has a lot of little innocent helpers here. He gave us the blueprint when he said he'd take the United States by confusion, and up to now he's done a fair job. Unless we stop fighting each other, unless we stop being selfish, we'll lose the war at home," said Major Lawrence Melton, national commander of the Disabled American Veterans.

"People on the Pacific Coast are the only ones on their toes," Melton reported. He has just completed a tour of forty-six states. "Other places you find people complaining about sugar rationing and taxes. On the Atlantic Coast people complain about dim-outs, elimination of night baseball games, loss of tourist trade."

"Those who fuss about sugar rationing should remember the boys on Corregidor who didn't complain about getting butter by the drop. To two men who were crying about no baseball at night I introduced an ex-Marine who lost both eyes in the battle of the Marne and hasn't seen

a baseball game since 1918.

"Businessmen who are worrying about what effect the war is going to have on their business should be worrying about how their business can help in our defense. People complaining about taxes should remember the men who gave up good salaries for base pay."

About Soldiers--Sailors

Alaska, July 30

My Dear Friends Mr. and Mrs. Pope I now have a little time to call my own so I thought I would write you a few lines.

I received the paper of July 10th and was certainly glad to get it. It is so nice to read all the local news and also about the Hamlin boys who are in the army, navy and marines. I sure enjoy some of those letters that are written to you by different boys. It is nice to learn where different boys are and what they have been doing that I went to school with at one time or another. They are really scattered.

I really enjoyed your editorial and especially what was said about July 6th. I can remember July 6th very well for other reasons. That day, I believe, was the hardest I had ever spent. We started out early Monday morning with around 100 lbs to carry and we finished our trip at about 8 or 8:30 that night and then we were not exactly free to rest. Most everyone made it in good fashion under the circumstances. Where you can remember July 6th for one reason I can remember it for two. I might say that it was a great experience in a lot of ways.

Well, I got my first promotion on July 25th. I, along with a friend of mine and 5 others were made Privates First Class. I was really glad to get it. I hope that I can prove that I am worthy of the promotion and then maybe there will be others. I read about where Charles Prater was made a corporal. Sure glad he made it and hope he can continue to go up.

Let me say in closing that we, the boys of Hamlin community certainly appreciate the way we are being backed. It does us good to say "We're from Hamlin". In return for your backing, we are working with everlasting energy for one goal, "Complete victory for the United Nations".

Your friend,
J. R. Elliott

—S & S—

Folks of Hamlin, folks anywhere in the world who love Freedom, Ye Editor is touched deeply to learn of the wonderful way our boys, our Hamlin boys especially, express themselves in the greatest struggle our nation has ever had. "Back 'em up", this expression makes something well up in our heart that prompts strong words. Like it or not, we have reached the point in this nation that we feel like saying, "To hell with any person who does not want to back up our fine young men." Some of our young men are already in the jungles of far-away islands fighting hand-to-hand, amid every conceivable danger, taking jabs and stabs through their hearts and lungs, and entrails . . . talk about "backing 'em up" Every word, look, act every bit of our strength here at home, must be given to these men. And now, won't you please notice how many and how often our Hamlin boys are being promoted? That is a token that they are making good soldiers, and expect something bigger and better. But all cannot become non-com and commissioned officers. If this paper can do anything on earth for them, it is too little. We only wish we could do something.

Dear Mr. Pope:

Thanks to a very sweet and thoughtful wife, I have just received the latest edition of the Hamlin Herald. I enjoyed reading it so much that I would like to subscribe for it.

It seems that all the fellows I knew and went to school with are in the armed forces of some kind. It seems that most of them like myself want to be sailors. It is a common known fact here at the training station that 45 per cent of the U. S. Navy is made up of Texans. When a fresh bunch of recruits arrive here instead of being asked what state they are from, every one asks them what part of Texas they are from.

I am now going to a naval aviation ordnance school. Here I learn all about every type of naval aircraft. How to service a plane for combat duty or load it for a bombing raid or to patch one up after an attack with the enemy. In other words we are the men who will "keep 'em flying."

The Herald stated that several of the Hamlin sailors were home on leave. I had planned on getting a leave to come home but it was suddenly cancelled. I would like to have seen my wife and folks very much, but I know that it won't be so awful long before we can all come home to Hamlin after we have taken care of those Japs and Nazis.

Well I must close now as the bugle has just sounded taps. Tell all my friends hello and to keep buying those war bonds.

Yours very truly,
Leonard Sowell

It is felt that Corporal Via will undoubtedly go much further before his army career is completed.

JUNK needed for War

In the barnyards and gullies of farms and in the basements and attics of homes is a lot of Junk which is doing no good where it is, but which is needed at once to help smash the Japs and Nazis.

Scrap iron and steel, for example.

Even in peacetime, scrap provided about 50% of the raw material for steel. It may be rusty, old "scrap" to you, but it is actually refined steel—with most impurities removed, and can be quickly melted with new metal in the form of pig iron to produce highest quality steel for our war machines.

The production of steel has gone up, up, UP, until today America is turning out as much steel as all the rest of the world combined. But unless at least 6,000,000 additional tons of scrap steel is uncovered promptly, the full

rate of production cannot be attained or increased; the necessary tanks, guns and ships cannot be produced.

The rubber situation is also critical. In spite of the recent rubber drive, there is a continuing need for large quantities of scrap rubber. Also for other waste materials and metals like brass, copper, zinc, lead and tin.

The Junk which you collect is bought by industry from scrap dealers at established, government-controlled prices.

Will you help?

First—collect all of your waste material and pile it up.

Then—sell it to a Junk dealer, give it to a charity, take it yourself to the nearest collection point, or get in touch with your Local Salvage Committee.

If you live on a farm, consult your County War Board or your farm implement dealer.

Throw YOUR scrap into the fight!

JUNK MAKES FIGHTING WEAPONS

One old disc will provide scrap steel needed for 210 semi-automatic light carbines.

One old plow will help make one hundred 75-mm. armor-piercing projectiles.

One useless old tire provides as much rubber as is used in 12 gas masks.

One old shovel will help make 4 hand grenades.

MATERIALS NEEDED

Scrap iron and steel.

Other metals of all kinds.

Old rubber.

Rags, Manila rope, burlap bags.

Waste Cooking Fats—When you get a pound or more, strain into a large tin can and sell to your meat dealer.

Miss Ozzie Folkes, Fisher County home demonstration agent, spent the day with Mrs. J. A. Jackson last Tuesday and they visited the club members of this community in the afternoon. The McCaulley club is one of the most progressive clubs of the county and our hats are off to them for the good work that they are doing, not only in club work but for the war effort.

Mrs. Dan Maberry has returned to her home after a three weeks visit with relatives in and near Lamesa.

Mrs. L. E. Rector was hostess to a large group of youngsters honoring her daughter, Patricia Louise on

Next Tuesday night, August 18, at the Tabernacle in McCaulley at 9 P. M. there will be a huge patriotic rally and you are urged to be there. There will be patriotic speeches, songs and a good program. There is hardly a family in our community who does not have a boy, brother, husband or some other relative in some branch of the service, and it is your duty and mine to put forth every effort in their behalf. So, folks, let's show the boys that our community and surrounding communities are behind them one hundred per cent. If your soldier or sailor boy and the boys in any branch of the service is at home on leave, we cordially invite them to attend this rally as honored guests of the McCaulley community. Tell your friends and every body to come. It will be worth your time.

O-O-O

There is one thing certain about Jimmie Allred's campaign. He has a platform and a sound and constructive platform, and it wouldn't be a bad idea for the people of Texas to study the qualifications of both Senator O'Daniel and Allred—before casting their vote. Jimmie Allred is not trying to go to Washington by telling the people that he plans to put cockle burrs under the tail of Washington politicians, and Jimmie Allred is not trying to go to Washington by telling the people that this government is going to the dogs without we elect him as our Senator, and if Jimmie goes to Washington he won't tell the people that our President took to the high seas when he heard he was in town. Jimmie Allred is too broadminded for such comedy and he knows and we know that we are living in a day when every man, woman and child in our land should be interested above all things in winning this war and a lasting peace.

Quoting from Judge Allred's speech in Abilene on August 4th:

"Above all, from the day I take office I shall fight for Texas farm

Our Sincere Appreciation

Every time we think of priorities we think of you with admiration. We think how you have applied your new knowledge of calories, vitamins and food values to turn into a good thing the new limitations put upon your kitchen. We think that only American women could adapt themselves so quickly, so easily and with such good humor. Then again we admire you for your patience with our new employees who have taken the place of so many of our regular employees who are now in the Armed Services.

Our hats off to those many customers who have cooperated with us and our new employees by shopping early in the week for their staple items, thereby releasing the major part of the time on Friday and Saturday to those employed in Defense Industries or on farms who must shop on the week-end.

as that is their only available time. We are able to give better service early in the week and the prices on staple grocery items that are advertised are kept in effect for an entire week so that everyone may share in this saving.

We realize all of this is because you know that priorities mean... That giving way to them is not granting a privilege to some other individual, but rather your personal cooperation with the all-out-for-victory program, and that anything you, or Safeway, can do to keep a plentiful supply of foods rolling to our Forces and our Allies is really for the ultimate good of all.

We are proud that it is our privilege to plan and work with you... COOPERATING AND WORKING TOGETHER WILL HELP WIN THIS WAR!

Nth KEEPS CAR A₁

MAN: Here she is... what'll you give me for her?

DEALER: Sounds like she just breathed her last. We want good second-hand cars but not this kind.

MAN: Why, it's got only 30,000 miles... and look! ...it's the same make, model and year as that gray job you've got tagged to sell for \$450.

DEALER: But that engine is OIL-PLATED and runs like new. Good for another 30,000 miles. Its owner took good care of it... greased it and drained the crankcase every thousand miles.

MAN: I always thought that was the bunk.

DEALER: Well, you've got a pile of junk there to prove you're wrong.

MAN: All right... all right... I'm wrong. Tell you what. I'll give you three hundred cash and my car for that one if you'll wise me to the motor oil that fellow used.

DEALER: It's a deal. He used Conoco Nth oil. That's oil with the synthetic that helps keep both the motor and the oil clean.

MAN: Oh, now I remember reading about that oil and the synthetics they use. Brother, I'll use nothing but Conoco Nth from now on!

equality. On my first day in the Senate I shall introduce a bill to provide for a minimum price of twenty-five cents per pound, basis middling, for all American grown cotton for the duration of the war. I shall fight for Texas rights." General Robert E. Lee said that he would never draw his sword against Virginia, and Judge Allred said: "I shall never lift my voice or acquiesce in any proposal or suggestion inimical to the interest of six million Texans. Old age assistance in Texas was started under my administration. For five long years all the money paid to the old people was from tax money raised by Jimmie Allred and matched by Franklin D. Roosevelt. My biggest fight for pensions, the climax of my fight for the people, was when I knew I would not be a candidate for Governor for a third term. I called the legislature in session to raise more money for the old people. This is a matter of record. No American should have to join a union to work on a defense job or in a war industry."

This vital job as Senator is up to the people. Whom do you want? Jimmie Allred, a native born Texan, or do you want the flour salesman from Kansas?
